

Current Binge Drinking

Data Source: Alaska Division of Public Health, Alaska Youth Risk Behavior Surveillance System
Table C-93

Definition

Adolescent binge drinking is the estimated percentage of high school students (grades 9-12) who consumed five or more drinks of alcohol for males or four or more drinks for females, within a couple of hours, on one or more of the past 30 days.

Related Objectives

Reduce the proportion of people under 21 years who engaged in binge drinking in the past month to 8.4%. - *HEALTHY PEOPLE 2030, OBJECTIVE SU-09*

Summary

- » About one out of nine (10.8%) Alaska Native high school students reported current binge drinking in 2019.
- » In 2019, there was no statistically significant difference in binge drinking between Alaska Native and Alaska White high school students.
